CSDF-3: Recover deleted files

Program (recover.py)

```
import os, re, shutil, sys

home = sys.argv[1] if len(sys.argv) > 1 else os.path.expanduser("~")
path     = os.path.join(home, ".local/share/Trash/files")
infopath = os.path.join(home, ".local/share/Trash/info")

print("Files found in Trash:")
for name in sorted(os.listdir(path)):
    print("  ", name)
print()
for name in sorted(os.listdir(path)):
    with open(os.path.join(infopath, name + ".trashinfo")) as f:
        for line in f:
            if line.startswith("Path="):
                dest = re.findall(r'/.*', line)[0].replace("%20", " ")
                if dest.startswith("/__HOME__"):           # demo remap only
                    dest = home + dest[len("/__HOME__"):]
                os.makedirs(os.path.dirname(dest), exist_ok=True)
                shutil.copy2(os.path.join(path, name), dest)   # copy back to original location
                os.remove(os.path.join(path, name))            # delete from Trash
                os.remove(os.path.join(infopath, name + ".trashinfo"))
                print(f"RECOVERED: {name}  ->  {dest}")
print("\nFiles left in Trash:", len(os.listdir(path)))
```

Output

```
$ ls ~/Documents
(empty)

$ python3 recover.py
Files found in Trash:
   marks.csv
   report.txt
   test.py

RECOVERED: marks.csv  ->  /home/user/Documents/marks.csv
RECOVERED: report.txt  ->  /home/user/Documents/report.txt
RECOVERED: test.py  ->  /home/user/Documents/test.py

Files left in Trash: 0

$ ls ~/Documents
marks.csv
report.txt
test.py
```
