STQA-2: Test cases for Gmail inbox functionality

Inbox

ID	Test case (verify that...)	Status
I1	Newly received email is highlighted in the Inbox.	
I2	New email shows sender, subject and one-line body preview.	
I3	Clicking a new email opens its content.	
I4	Email content shows with the intended formatting.	
I5	Attachments are present and downloadable.	
I6	Attachments are virus-scanned before download.	
I7	Emails marked as read are not highlighted.	
I8	Read and unread emails show a time at the end of the list entry.	
I9	Unread count is shown next to 'Inbox'.	
I10	Unread count goes up by one on a new email.	
I11	Unread count goes down by one when an email is read.	
I12	CC recipients are visible to all.	
I13	BCC recipients are not visible to the user.	
I14	Received emails pile up in Inbox and old ones are deleted cyclically when space is short.	
I15	Email can be received from non-Gmail ids (Yahoo, Hotmail).	

Compose mail

ID	Test case (verify that...)	Status
C1	Clicking 'Compose' opens a compose frame.	
C2	To/CC/BCC accept ids and give suggestions while typing.	
C3	Multiple comma-separated ids are accepted.	
C4	Subject can be typed.	
C5	Body can be typed.	
C6	Formatting options (font, size, bold, italic, underline) work.	
C7	A file can be attached.	
C8	Images can be added and resized.	
C9	Mail with To/CC/BCC, subject and body is delivered on Send.	
C10	Sent mail appears in 'Sent Mail'.	
C11	Mail can be sent to non-Gmail ids.	
C12	Sent mail piles up and is deleted cyclically when space is short.	
C13	Unsent composed mail stays in Drafts.	
C14	Maximum number of recipients in To/CC/BCC.	
C15	Maximum length of the Subject.	
C16	Content limit for text/images in the body.	
C17	Maximum size and number of attachments.	
C18	Only allowed attachment types can be attached.	
C19	Sending without a subject shows a warning pop-up.	
C20	After accepting the pop-up, the mail is sent.
